

EXECUTIVE SUMMARY

May 2020

Amended

The El Paso Metropolitan Planning Organization's (MPO) Transportation Policy Board (TPB) adopted the Destino 2045 Metropolitan Transportation Plan (MTP) on May 18, 2018. In consultation with the U.S. Environmental Protection Agency (EPA), the Texas Commission on Environmental Quality (TCEQ), and the Texas Department of Transportation (TxDOT), the Destino 2045 MTP and the Destino 2019-2022 TIP were found to meet all the requirements for a joint FHWA/FTA conformity determination, under the Cean Air Act Amendments of 1990, on November 6, 2018.

On June 4, 2018, EPA designated Sunland Park, New Mexico as non-attainment in accordance with the 2015 8-hour ozone standard. As such, a conformity determination for the Sunland Park, NM non-attainment area was required by August 3, 2019. The El Paso MPO's TPB adopted a transportation conformity report for the Sunland Park, NM non-attainment area on January 25, 2019 and a joint FHWA/FTA conformity determination was approved on July 22, 2019.

A Metropolitan Transportation Plan (MTP) is a long range transportation plan for urbanized areas. The MTP development process is designed to coordinate local vision and needs with national performance measures and planning criteria. The Destino 2045 MTP provides for the long-term travel needs of the community in a balanced and financially responsible manner. Goals and Objectives provide the framework to guide decision-making about selecting and prioritizing projects to address the region's travel needs.

In the fall of 2019, the El Paso MPO identified a need to amend the Destino documents, which would require a new conformity determination. Loop 375 (Purple Heart) widening from US 62/180 Montana Ave. to Spur 601 would be delayed and not let on time, therefore, it would not be completed in the network year identified in the most recent conformity determination. This along with the development of the El Paso MPO's Regional Mobility Strategy (RMS) 2020, which identified several projects that would need to be go through the conformity process for an amendment to the Destino 2045 MTP.

The El Paso MPO used Decision Lens software to support and enhance decision making and assist in project evaluation and prioritization. The RMS 2020 and the updated El Paso MPO's Congestion Management Process (CMP) were key inputs to developing multimodal priorities for inclusion in the Amended Destino 2045 MTP. Consensus from stakeholders to optimize funding was a key feature of this process.

There were no new projects developed for the Amended Destino 2045 MTP and the basic financial assumptions remain the same as the original Destino 2045 MTP, but several projects moved between network years. TxDOT moved 6 projects to outer years based on regional priorities. This freed up \$176M of funding for local government projects to be accelerated.

The timing for the new 2021-2024 STIP/TIP development in Texas coincides with the development of the Amended Destino 2045 MTP. Some projects requiring a conformity determination are included in the Destino 2021-2024 TIP, and will be approved contingent on a new conformity determination.

Fiscal constraint is a major component for these amendments. The Amended Destino 2045 MTP has approximately \$6B of multimodal projects and programs included in fiscal years (FY) 2019-2045. The El Paso MPO study areas stretches across the state line between Texas and New Mexico, including El Paso County in Texas, Southern Dona Ana County, and a portion of Otero County in New Mexico.

Facilitating the movement of people and goods throughout the region over this period of time presents numerous challenges from a financial standpoint. Projects and programs in the Texas portion of the El Paso MPO study area are approximately \$5B. Transit projects come to approximately \$983M. New Mexico highway projects total approximately \$60M.

A new Destino 2021-2024 TIP will cover a program horizon of four fiscally constrained years. The Destino 2021-2024 TIP is consistent with the Amended Destino 2045 MTP, and contains regionally significant projects to be funded with federal and non-federal funds. The Destino 2021-2024 TIP is fiscally constrained for transit projects and highway projects in the New Mexico and Texas portion of the El Paso MPO study area.

Much of the federal funding categories that flow through TxDOT into the TIP/MTP are based on revenue forecasts in TxDOT's 2021 Unified Transportation Program (UTP). The UTP reflects the projects and programs that may be delivered in Texas over a 10-year period. Close coordination is ongoing with NMDOT on available funds to be used in New Mexico.

Transit projects are funded with FTA funds and local funds. Most of the transit funding is for Sun Metro projects, the mass transit provider in the region, but transit projects in the county of El Paso and Dona Ana county in New Mexico are also included.
